Profile

Full Stack MERN Developer with hands-on experience in building scalable web applications using MongoDB, Express.js, React.js, and Node.js. Worked on real-world projects and freelance-based development, focusing on creating responsive, user-friendly interfaces and integrating backend APIs with secure authentication systems. Skilled in developing end-to-end applications including frontend UI, backend services, and database management. Passionate about building impactful products and continuously improving technical skills. Currently learning Next.js and TypeScript to build scalable modern web applications.

Work Experience

Whizlancer Infotech Private Limited

Nov/2024 – Oct/2025

Frontend Developer (Contract)

Meetn – Video Conferencing Web Application

- Developed a React-based frontend for a video conferencing web app (Meetn).
- Implemented real-time features using WebRTC and Socket.io.
- Integrated frontend with REST APIs for authentication and data handling.
- Built responsive UI and optimized performance across devices.

Freelance Full Stack Developer (MERN Stack)

Nov/2023 – Present

- Built 2+ full-stack web applications using the MERN stack.
- Designed and developed end-to-end applications including 8+ REST API endpoints and database integration.
- Developed solutions for local businesses (gym/shop automation) handling 50+ records and daily workflows.
- Implemented 4+ core features including dashboards, user management, and API integration.
- Created responsive UI and deployed applications using Vercel, Render.

Skills

Frontend: React.js, Redux, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL, PostgreSQL

Tools: Git, GitHub, Postman, Axios, Deployment (Vercel, Netlify, Render)

Projects

DocsCare – Healthcare Management App

Technologies: MongoDB, Express.js, React.js, Node.js, JWT Auth, Axios, REST APIs, Raw CSS

- Built a full-stack healthcare platform with 3 separate panels (Admin, Doctor, and User) with role-based authentication.
- Implemented 6+ core features including appointment booking, dashboards, and patient record management.
- Developed and integrated 12+ REST API endpoints for seamless frontend-backend communication.
- Designed responsive UI and deployed on Netlify/Vercel with backend on Render.

Hubly – Customer Relationship Management App

(Built during Cuvette Full-Stack Development Training Program) Technologies Used: React.js, Node.js, Express.js, MongoDB, JWT Auth, Axios, Raw CSS, Recharts

- Built a full-stack CRM system with role-based authentication for managing customer support workflows.
- Developed 5+ core features including ticket creation, status tracking, and priority management.
- Implemented filtering, searching, and categorization to handle large sets of tickets efficiently.
- Integrated 8+ REST API endpoints and visualized data using charts for better insights.
- Designed responsive UI ensuring smooth user experience across devices.

Education

Electrical & Electronics Engineering (B.Tech)

2019 – 2023

GALGOTIA COLLEGE OF ENGINEERING & TECHNOLOGY

CLASS XII (ISC)

2018 – 2019

LITTLE FLOWER SCHOOL, GORAKHPUR

Certificates & Trainings

- PYTHON Certified by Udemy
- Fullstack Web development training Program at Cuvette Tech Pvt. Ltd.
