## Profile

Frontend Developer with 1+ year of experience in building responsive, production-ready web applications using React.js and modern JavaScript. Strong expertise in component-based architecture, state management, API integration, and performance-optimized UI development.

## Work Experience

**Whizlancer Infotech Private Limited** Nov/2024 – Dec/2025  
*Frontend Developer*

### Meetn – Video Conferencing Web Application

- Developed a production-ready React-based frontend UI for a browser video conferencing platform similar to Google Meet.
- Implemented meeting creation and joining flows using reusable React components.
- Built real-time video/audio interface using WebRTC integrated with React lifecycle.
- Designed and implemented real-time chat and screen sharing UI using Socket.io.
- Created fully responsive layouts following modern frontend best practices.
- Integrated frontend with backend APIs for authentication and session handling.
- Optimized UI performance and ensured smooth user experience across devices.
- Used component-based architecture to improve UI maintainability and reusability.
- Managed UI state and component rendering efficiently using React hooks.

## Skills

**Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap  
**Backend (Working Knowledge):** Node.js, Express.js, REST APIs  
**Databases:** MongoDB, MySQL, PostgreSQL  
**Tools:** Git, GitHub, Postman, Axios, JWT Authentication, Deployment (Vercel, Netlify, Render)

## Projects

### DocsCare – Healthcare Management App

*Technologies: MongoDB, Express.js, React.js, Node.js, JWT Auth, Axios, REST APIs, Raw CSS*

- Developed a full-stack healthcare management system with JWT authentication, protected routes, and role-based access for doctors and patients.
- Implemented appointments CRUD, dashboards, patient records UI, and real-time data rendering with REST API integration.
- Designed a fully responsive, mobile-first UI using custom CSS and deployed the frontend on Netlify/Vercel with backend on Render.
- Built protected routes and role-based UI rendering using JWT authentication.
- Integrated frontend with REST APIs using Axios, handling loading and error states.
- Designed separate dashboards for doctors and patients to streamline appointment and record management workflows.

### Hubly – Customer Relationship Management App

*(Built during Cuvette Full-Stack Development Training Program) Technologies Used: React.js, Node.js, Express.js, MongoDB, JWT Auth, Axios, Raw CSS, Recharts*

- Developed a full-stack CRM system with user authentication and role-based access.
- Built React-based dashboards for ticket creation, status tracking, and priority management.
- Implemented ticket filtering, searching, and priority-based categorization in the UI with backend API integration.
- Visualized ticket trends and status distribution using Recharts for better insights.
- Designed a fully responsive and intuitive UI using React and custom CSS, ensuring smooth user experience across devices.

## Education

**Electrical & Electronics Engineering (B.Tech)** 2019 – 2023  
GALGOTIA COLLEGE OF ENGINEERING & TECHNOLOGY

**CLASS XII (ISC)** 2018 – 2019  
LITTLE FLOWER SCHOOL, GORAKHPUR

## Certificates & Trainings

- PYTHON Certified by Udemy
- Fullstack Web development training Program at Cuvette Tech Pvt. Ltd.
