Profile

Full Stack MERN Developer with hands-on experience in building scalable web applications using MongoDB, Express.js, React.js, and Node.js. Worked on real-world projects and freelance-based development, focusing on creating responsive, user-friendly interfaces and integrating backend APIs with secure authentication systems. Skilled in developing end-to-end applications including frontend UI, backend services, and database management. Passionate about building impactful products and continuously improving technical skills.

Work Experience

Freelance Full Stack Developer (MERN Stack)

Nov/2023 – Present

- Engineered custom inventory and daily workflow web applications for local retail and fitness clients, digitizing 50+ daily operational records.
- Designed and developed secure backend architectures utilizing Node.js and Express.js, implementing 8+ REST API endpoints and MongoDB database integration.
- Architected responsive frontend dashboards using React.js and Tailwind CSS, deployed live via Vercel and Render.
- Implemented secure role-based JWT authentication and comprehensive user management systems.

Skills

Frontend: React.js, Redux, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB

Tools: Git, GitHub, Postman, Axios, Deployment (Vercel, Netlify, Render)

AI Tools: ChatGPT, Gemini, Claude (for development assistance and debugging)

Projects

Medicare – Pharmacy E-commerce Platform (Ongoing)

- Building a platform to search medicines and upload prescriptions.
- Working on authentication and product listing features.

DocsCare - Healthcare App | docscare.vercel.app 

Technologies: MongoDB, Express.js, React.js, Node.js, JWT Auth, Axios, REST APIs, Raw CSS

- Architected a scalable healthcare platform with 3 distinct, secure panels (Admin, Doctor, User) using role-based JWT authentication.
- Implemented 6+ core features including appointment booking, dashboards, and patient record management.
- Developed and integrated 12+ secure REST API endpoints for seamless frontend-backend data flow and appointment management.
- Engineered patient record dashboards and booking workflows, deploying the frontend on Vercel and the backend architecture on Render.

Hubly – Customer Relationship Management App 

(Built during Cuvette Full-Stack Development Training Program) Technologies Used: React.js, Node.js, Express.js, MongoDB, JWT Auth, Axios, Raw CSS, Recharts

- Engineered a comprehensive CRM system using the MERN stack for dynamic customer support workflows and ticket management.
- Developed 5+ core features including ticket creation, status tracking, and priority management.
- Implemented filtering, searching, and categorization to handle large sets of tickets efficiently.
- Integrated 8+ REST API endpoints and visualized data using charts for better insights.
- Designed responsive UI ensuring smooth user experience across devices.

Education

Electrical & Electronics Engineering (B.Tech) GALGOTIA COLLEGE OF ENGINEERING & TECHNOLOGY	2019 – 2023
CLASS XII (ISC) LITTLE FLOWER SCHOOL, GORAKHPUR	2018 – 2019

Certificates & Trainings

- Fullstack Web development training Program at Cuvette Tech Pvt. Ltd.
- PYTHON Certified by Udemy
- Hands-on training in MERN stack (React, Node.js, MongoDB)
